Company Background:

Wohler Technologies Inc. offers a comprehensive range of products that simplify analog and digital source monitoring in facilities of all sizes and complexity. Wohler Technologies was founded in 1987 and, through constant innovation, continues to be a world leader in providing in-rack audio, video, and data monitoring and captioning solutions for the broadcast, motion picture, and professional audio/visual markets. More information about the company and its technologies is available at www.wohler.com.

Wohler at CAPER 2009:

Products on display during CAPER 2009 include versatile 16-channel audio monitors that accommodate a mix of inputs and outputs for SD, HD, and 3G operations; intuitive touch-screen systems that simplify video monitoring and routing while providing critical functional enhancements; versatile HD monitors for all variety of signal types; and analog and digital audio monitoring systems and level meters that together accommodate virtually every audio input type.

Wohler Products at CAPER 2009:

AMP2-16 Series Modular 3G Audio Monitor With Dolby® Capability

Wohler's AMP2-16 Series modular audio monitor provides simultaneous level metering of up to 16 channels of audio as well as flexible loudness indication from the user's choice of input and output cards. Options include 3G, HD/SD-SDI, AES, and analog cards, as well as system-wide Dolby® D, E, and DD+ upgrades. The intuitive interface, complete with an integrated help system, allows users to manage presets, channel clusters, and mixing and routing.

RM Dual-Input LCD Monitoring Series With Waveform Display

Ideal for use in mobile trucks, news and transmission control rooms, and duplication and post-production facilities, each new RM series dual-input LCD rack includes two auto-sensing HD/SD-SDI and analog composite inputs. In addition to two-channel analog audio support, the racks provide one-channel-pair audio monitoring via a headphone jack or built-in speaker. All three of the new dual-input monitors are available with a waveform and vectorscope display as standard.

Touch-it™ Digital Multichannel Video Monitor

Wohler's Touch-it™ Digital offers unique multichannel video monitoring functionality in a smart, affordable design. The 3RU system features dual 7-inch high-resolution color LCD displays. The left monitor is a touch screen that displays from four to 16 thumbnail images. When one of the images is touched, the video source appears on the right monitor at full size and its HD/SD-SDI source signal is sent to an unbalanced output and to a VGA output for monitoring on an external display. The Touch-it Digital accepts and switches sixteen standard HD/SD-SDI video inputs, passing along any embedded audio. When combined with a Wohler E-Frame, closed-captioning, and logo keyer E-Cards, the Touch-it Digital serves as an elegant and cost-effective master control system.
