For Immediate Release

**Wohler's New 19-Inch HDMon-190 Brings Convenience
and Quality to HD Monitoring**

***New TFT Widescreen Monitor Features Robust Signal Processing and
Versatile Configuration Suited to Professional Field or Studio
Production***

HAYWARD, Calif. — Jan. 30, 2008 — PANORAMAdtv, the video products division of Wohler Technologies Inc., today announced the release of the HDMon-190, a high definition 19-inch widescreen monitor designed to meet the needs of broadcast professionals in both field and studio applications. With extensive motion processing capabilities and user-adjustable scaling and interpolation for interlaced images, the monitor provides superb imaging for video in any format or resolution.

"We developed the new HDMon-190 TFT monitor as a versatile solution for professional broadcast applications, regardless of the production environment," said Carl J. Dempsey, CEO and president of Wohler. "We have remained the best at what we do by working with our customers to provide cutting-edge solutions that meet application and budget needs. The flexible operation and full-featured functionality of the HDMon-190 allows users to monitor video just the way they want without sacrificing quality or convenience."

The HDMon-190 features a 1440x900 TFT/LCD screen and accepts all inputs, including HD/SD-SDI with buffered loop-through, composite and component video, S-video, DVI, HDMI, and PC graphics up to WUXGA resolution, all without the need for optional cards. Users can view video signals in a 4:3 or 16:9 aspect ratio.

The monitor's high-resolution screen, which accepts video signals up to 1920x1080/60p, is factory-adjusted to meet SMPTE/EBU colorimetric and color gamut specifications for CRT models. Its standard CRT functions include channel isolate, overscan, underscan, and power-saving auto off, as well as automatic and manual color temperature.

Lightweight and sleek in design, the 7-RU monitor can easily convert from a portable stand-alone unit to a rack-mount solution. Control settings are easy to access from the monitor's front panel, and an integrated 10/100BaseT Ethernet connection allows remote configuration via the included Windows®-based NETMON software application. This remote feature allows users to use a laptop or PC to adjust and configure units, as well as copy and paste setups from one monitor to another.

More information about the HDMon-190 and other products from PANORAMAdtv is available at www.wohler.com.
