## **Wohler's New Touch-Comm Multiviewer Enables Flexible Monitoring, Routing, and Communications**

***Touch Screen Solution Supports Monitoring and Routing of up to 12 Sources, Facilitates Communication Among Multiple Touch-Comm Users***

**Hayward, Calif. — April 14, 2008** — Wohler Technologies Inc. video products division, PANORAMAdtv, has partnered with Intracom Systems LLC to introduce the Touch-Comm multiview system, a touch screen solution that combines flexible monitoring and routing of up to 12 video sources with multichannel intercommunication among Touch-Comm users despite geographical barriers.

“Our strategic business partnership with Intracom Systems has enabled the integration of versatile communications into our award-winning LCD video monitoring product line,” said Carl J. Dempsey, Wohler president and CEO. “Touch-Comm users can manage video with flexibility and exchange critical information or instructions with other users anywhere in the world. This enhanced functionality enables easy yet highly effective management of multiple video feeds in a variety of applications.”

The latest addition to Wohler's Touch-it™ line of touch screen video monitoring solutions, the Touch-Comm unit consists of two touch screen control panels. The left touch panel displays up to 12 thumbnail video images. A simple touch to a thumbnail will route that source to an external monitor for enhanced viewing. The right touch screen is the communication control panel of an IP-based matrix intercom system that facilitates non-blocking, multichannel intercommunication

among Touch-Comm users, wherever they may be located. Touch-Comm is dynamically configurable for any mixture of point-to-point calls, group conferences, and party lines.

Touch-Comm is highly interoperable with other communications systems including digital matrix systems, two-way radios and phone networks. The all-touch screen interface provides simple operation with minimal distraction and is intended for a wide range of surveillance, public service, video production, and emergency command environments. The unit is available either with an integrated microphone or a headset jack.
