Wohler at KOBA 2010:

Wohler's exhibition at KOBA 2010 will feature acclaimed products that increase broadcasters' flexibility and efficiency in managing complex audio monitoring processes in digital and HD broadcast environments. The company's award-winning line of versatile 16-channel modular monitoring systems will be represented by the new AMP2-16V, which combines video monitoring with comprehensive audio management capabilities to provide robust functionality in a single attractively priced system.

New Wohler Products at KOBA 2010:

AMP2-16V Series Modular Audio/Video Processing Monitor

Wohler will feature the award-winning AMP2-16V Series 16-channel audio/video processing monitor, a new dual 4.3-inch OLED version of the company's acclaimed AMP2-16 Series modular audio monitor. Dedicated video monitoring, loudness metering and control, audio mixing and routing, and instantaneous Dolby® bitstream analysis, called Dolby Zoom, make the AMP2-16V one of the most flexible and comprehensive 3G/HD/SD-SDI audio/video monitors available. Dolby Zoom, applied to all installed digital modules with a Dolby upgrade, dynamically switches between the standard overview of monitored channels and monitoring of the decoded

More...

channels and metadata of an available Dolby bitstream without entering any menus. The full trim, pan, and routing controls of the mix mode feature reduce dependence on mixing consoles.

The right-hand screen remains “Audio Central” with simultaneous color- and scale-adjustable metering of up to 16 channels of audio from a choice of input and output cards including 3G/HD/SD-SDI, AES, and analog. Also on display is variable-timescale loudness metering and selected metadata. In addition to the same friendly user-interface and help system as before, front-panel hotkeys can now be assigned to not only solo or mute groups of channels and recall system-wide presets, but also to activate Dolby Zoom on a target source or to instantly apply a saved mix setup.

AMP1-16 Series 16-Channel Multirate SDI Audio/Video Monitor With Optional Dolby®

At KOBA 2010, Wohler will highlight the AMP1-16 Series monitor, the world's first to simultaneously monitor video and all 16 channels of a 3G/HD/SD-SDI signal in 1 RU. Audio level meters for 16 channels, cluster-based ITU-1770-1 loudness metering, metadata, and video are all viewable at the same time on three OLED display screens. These units marry the power of flexible monitoring and output with a friendly help system and configurable front panel buttons, which can solo, mute, and recall system-wide presets. The monitors are available with optional Dolby® D, E, and DD+ as they are released.

SPOKESPERSON QUOTE:

“Wohler products are known for providing a high degree of functionality in designs that fit broadcasters’ operations and at prices that meet their budgets. At KOBA 2010, the new AMP2-16V along with our AMP1-16 monitor both offer this value, simplifying key monitoring tasks even in complex broadcast environments.” – Kim Templeman-Holmes, vice president of global sales and marketing for Wohler Technologies.
